Noise Level Timeline

How to Read This Report

Understanding the Timeline:

The chart shows your noise levels over time. Higher bars mean louder noise, lower bars mean quieter periods.

Color Zones:

- Quiet (Green): Normal, acceptable noise levels
- Moderate (Yellow): Above normal but not excessive
- Elevated (Orange): Noticeably loud, potentially disruptive
- High (Red): Very loud, clearly excessive and disturbing

Reading the Numbers:

Levels range from 0 to 1, where 0 is silent and 1 is maximum. Most disturbances show as spikes in the chart.

Using Statistics:

Total readings show how long you monitored. Average and peak levels indicate typical vs worst-case noise.

For Complaints:

The timestamps prove WHEN disturbances occurred. The chart proves HOW LOUD they were. Together, they create undeniable evidence.

Noise Analysis

Quiet periods (<10%): 6,524 readings (99.7%)

Moderate noise (10-30%): 20 readings (0.3%)

Loud noise (30-50%): 0 readings (0.0%)
